Low Ambient Kits with Crankcase Heaters

On all straight cool low ambient kit offerings the crankcase heater is to be used only on the 9,000, 12,000 and 15,000 Btu/h compressors. Any compressors 18,000 Btu and larger does not require a crankcase heater per the manufacturers recommendations.

The following are current low ambient kit part numbers:

Single Zone Condensers:

Cooling only kit: 550-572 (Used on SCC 9,000 and 12,000 Btu 115 volt models)
550-381 (Used on SCC 9,000 thru 15,000 Btu 208/230 volt models)
550-573 (Used on SCC 9,000 thru 15,000 Btu 265 volt models)
550-1128 (Used on SCC 18,000 thru 36,000 Btu 208/230 volt models)

Multi-Zone Condensers:

550-1154 (Used on MC2 9,000 thru 15,000 Btu 208/230 volt models)
550-1126 (Used on MC4 9,000 thru 12,000 Btu 208/230 volt models)
550-1127 (Used on MC4 15,000 thru 30,000 Btu 208/230 volt models)

Single Zone Heat Pumps:

Heat pump kit: 550-356 (used on SHC 9,000, 12,000 and 15,000 Btu 115, 208/230 and 265 volt models)
550-1129 (used on SHC 18,000 thru 36,000 Btu 208/230 and 265 volt models)

Note: All Multi-Zone heat pump (MH2 / MH4) models require FACTORY INSTALLED low ambient option. NO FIELD INSTALLED KITS AVAILABLE.
